PROFILE SUMMARY

Experienced as Data Analyst (Data Processing / Visualization / Reporting / Database Management) and Frontend Developer (UI/UX Implementation / Web Development). Passionate about turning raw data into actionable insights and building user friendly interfaces. I am highly curious, adaptive, and eager to continuously learn in both analytics and development fields. I have developed strong leadership through leading organizational activities on five different occasions, while also strengthening my critical thinking, time management, teamwork, problem solving, and discipline throughout my academic and professional journey.

INTERNSHIP EXPERIENCE

RSUD Tarakan Jakarta — Feb 2025 - Feb 2026

- Analyzed hospital data provided in Excel to identify patterns and insights
- Collaborated with the IT team to design ERD and sequence diagrams, ensuring accurate representation of data flows.
- Enhanced skills in Excel, and data visualization through healthcare data management projects.
- Created structured reports and identified trends in patient and operational data
- Assisted in ongoing IT projects, contributing to system development and implementation
- Created Website Application for Booking Meeting Room for Employees to make Online Reservation

FREELANCE EXPERIENCE

Persatuan Perawat Nasional Indonesia (PPNI) — Des 2024

- Monitored the exam process to ensure smooth and orderly execution
- Ensured compliance with examination rules and regulations
- Supervised participants to maintain fairness and integrity during the test
- Provided assistance to candidates when technical or procedural issues arose

ORGANIZATION EXPERIENCE

Member of the activity — Feb 2023 - Jan 2025

Google Developer Student Club Malang

- Becoming part of GDSC to deepen my knowledge and experience, to help and collaborate in solving problems together.

Head division in Techfest 2024 — Jul 2024

- Techfest is one of the major events organized by the Himpunan Mahasiswa Teknik Informatika, involving students from various Binus University campuses, such as Binus Alam Sutra, Binus Kemanggisan, Binus Bekasi, and Binus Senayan. For this event, I was selected as the Head of the Security and Equipment Division for 2024. I accepted the role with great enthusiasm, fostering teamwork with my colleagues and managing my division's work schedule effectively.

Leader of the activity — Okt 2022 - Okt 2023

Teach For Indonesia (TFI)

- During this activity, I conducted a Virtual Based Learning session for junior high school students, providing material related to natural science to help them gain a better understanding of the subject.
- Providing education to the younger generation by fostering high tolerance among different religions to achieve peace and mutual understanding among people.
- Providing education to the younger generation by emphasizing the importance of knowledge in life and its benefits, which will impact their lives.

Vice Head division in VRam 2024 — Apr 2022

- VRam is one of the major events organized by the Informatics Engineering Student Association, involving students from various Binus University campuses, such as Binus Alam Sutera, Binus Kemanggisan, Binus Bekasi, and Binus Senayan. In 2022, I was selected as the vice chairperson for this event. I accepted the role with great enthusiasm, fostering teamwork with my colleagues and managing collaboration timelines to ensure the event ran smoothly.
